I found a quick and painless cure.

When I developed hemorrhoids, my doctor recommended Hemcure...the painless, non-surgical treatment method performed by M.D.s. It took only a few short visits to the doctor's office. And since no recuperation was needed, I could resume my normal activities right away.

With Hemcure, curing my hemorrhoid problem was simple. Any cost, my insurance covered it.

Hemorrhoids aren't the easiest thing to talk about. But listen, if you've got hemorrhoids, why suffer? Do as I did and call to find out more.

Spotter training set in area for April 15

Severe weather spotters are needed and a training has been set for 7 p.m. on April 15 at the high school in St. Francis.

Gary Rogers, emergency manager, reported that spotters are needed especially in the rural areas where trained spotters can stand in their yard and relay weather conditions to the main office in St. Francis.

"These rural severe weather spotters can help keep other weather spotters from having to travel into dangerous areas," Manager Rogers said.

A spotter training class is held each year and helps train new spotters as well as giving experienced spotters a refresher course.

Manager Rogers organizes the class and urges anyone interested in becoming a severe weather spotter or just those interested in knowing more about studying clouds and severe weather formations may also attend.

There are also other trainings planned in the area including:

2002 Kansas tornado facts

Last year was a continuation of the trend of tornadoes — there were more and the number was above normal. There were 95 tornadoes recorded in Kansas which is 44 above normal. However, there were no deaths and only one person was injured and that injury was near Mullinville in Kiowa County.

Across central and western Kansas, most tornadoes occur in April, May and June. The 61 tornadoes in May set a record for any month in Kansas since 1950. Southwest Kansas saw large, powerful and long-lived tornadoes, many occurring on May 7. One in Ford County moved south-

west, then southeast, as it killed several dozen cattle, carrying some 1,500 pound heifers 3/4 of a mile. Ford County had eight tornadoes, the most tornadoes in one county, and one tornado was measured over a mile wide.

The most destructive tornado of the year hit Pratt on May 7 causing \$20 million.

The first tornado last year occurred in Reno County on April 11 and the last tornado was recorded in December in Cherokee County. In fact, there were two tornadoes recorded in December.

If a tornado is sighted, people are urged to take cover in a basement or

inside room until the danger has passed. Those wishing to know more about tornadoes should plan to attend the severe weather spotter training on April 15 at the high school.

For more information, contact Manager Rogers at 785-332-2560.
