

Memorial Roster

The Memorial Roster Committee of the Kansas Day Association assembled the following record of Cheyenne County residents or past residents who died during 2009.

Even their best efforts are not enough to be able to say, with certainty, that the record is complete, for the deaths of many of the county's past residents are never known by the Kansas Day Memorial Roster Committee. Public input is encouraged in helping compile the roster.

Should anyone know of the death of a former Cheyenne County resident who is not included on this year's record, please contact, Janet Carman, the Kansas Day Association secretary.

In the coming months, should anyone be aware of any names which should be included, please let the committee know so the information can be included in the Memorial Day Roster 2010.

Letter to the Editor

To the Editor:

How much is 1.34 trillion??

The following number comparison are taken from Yahoo news, and credited to authored, Jim Abrams, (Associated Press Writer) titled -

"A trillion dollars taxes the mind and the taxpayer"

Only a part of this article was used as a source for the numerical comparisons.

How much is 1.34 trillion dollars?

- Counting to a 1.34 trillion, one per second will take you 31,688 years.
- \$1.34 trillion dollars is \$4,500

for every citizen in the U.S., man, women and child.

- 1,000 dollar bills stacked one on top of the other would extend 67 miles high.
- 1.34 trillion miles would let you circle the earth at the equator, which is 25,000 miles around, 54 times, if you have that as a goal.
- A trillion is followed by 12 zeros -(1,000,000,000,000).
- The earth has been around for 4.5 billion years, 1.34 trillion years is equal to 300 earth lives of 4.5 billion years.
- Looking at modern history, 1.35 seconds would take us back 40,000 thousand years to the time

of the Neanderthals, using stone tools, not to mention what we would be wearing.

"The United States total accumulated debt," (that 'We the People' have accumulated as debt), plus projected spending by this administration will put our total national debt over \$40 trillion dollars. I can hear the people in the asylum saying that sounds reasonable to me, lets spend some more.

* I have no idea why 1.34 trillion as a number was used in this article other than convenience, for comparison sake.
