LET FREEDOM RING!

I think freedom is great because it lets you speak your mind and it tells us that our founding fathers died for us to give it to us. Without freedom our lives would still be ruled by Britain and most likely be ruled by

a king or queen. That's why we are trying to free other countries from communist rulers.

Bryce Engelbert

When I think about being an American one word comes to mind: freedom. In this amazing country we live in, we are able to do and say what we want thanks to the great leaders and founding fathers before us. Still today we have courageous men and

women fighting all around the world for what we *should* be entitled to: freedom. These brave people are willing to give their lives to stand up for what is right. For this I am very grateful.

Caitlin Measels

To me being an American citizen is one of the best things in life. Being an American allows me to do all the things that a teenager needs to do. If I didn't live in America then I wouldn't be receiving the education that I receive at this point. And a good education is what I need to become my life's

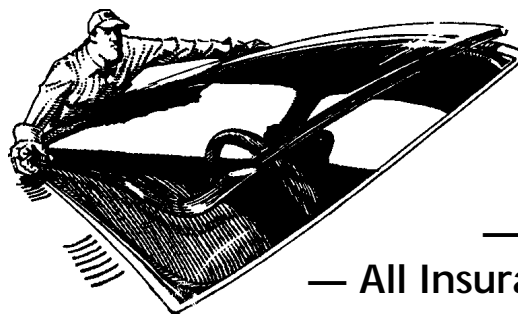

dream, a veterinarian. And being an American citizen helps me to live this dream.

I think that all Americans should be proud that they were born in America where everyone is FREE!
