**Uncover:** "The amazing results" documenting the SUNHEAT solar zone electronic heating system's many benefits. To inform you on the SUNHEAT zone concept, we would like to share some background information with you. The SUNHEAT is remarkably efficient due to its use of the specially developed safe infrared heat chambers. Each chamber utilizes three unique solid copper heat exchangers. Over 30 years of research and field-testing stand behind infrared heat in residential and commercial applications worldwide.

The best way to describe this system's potential is to first describe its benefits. The manufacturer has concentrated its design efforts around the three most important consumer benefits of any heating system: economy, comfort, and safety. The resulting performance cannot be outperformed by any other heating system on the market.

Incredibly the SUNHEAT uses 35% less energy than a conventional electric furnace/baseboard system. The SUNHEAT will heat more efficiently than the Heat Pump. When compared with today's skyrocketing gas, propane, and fuel oil cost, the SUNHEAT zone heater provides unbelievable savings. There is no heat wasted near the ceiling. The unique solar zone process virtually prevents the wasteful air layering as with conventional heating systems.

The SUNHEAT requires no installation and can be plugged into any 110 volt outlet. There is a lower purchase/installation cost per heated square foot than any other system. Our zone heater requires no special 240v wiring or expensive, inefficient ducting, piping or chimney. Home or business owners can install the system with no problem. Simply plug it in.

Our zone area heating concept saves money. Using individually controlled units, the SUNHEAT system provides heat only where and when it is needed for more control over area comfort and energy bills.

There is lower operating and maintenance costs than conventional heat systems and the SUNHEAT is virtually maintenance free. There is no unwanted changing of filters or high prices for replacements since our zone heaters have a lifetime washable filter. There are absolutely no burners to adjust or replace. Long-life industrial infrared commercial tube quartz is replaced easily and inexpensively. A full three-year warranty, including the new commercial quartz tubes, protects the consumer's investment. The SUNHEAT does not remove humidity from the air! It actually helps maintain desirable humidity levels. Also, water does not readily collect on the windows as with conventional systems.

Due to SUNHEAT'S unique concept, the floors stay warmer since the air is mixed at ground level. This makes the temperature, from floor to ceiling, no more than 2 degrees difference.

This one of a kind system operates as quietly as a whisper! The SUNHEAT'S efficiency is based on the distribution of energized air as well as water molecules which do not depend on high-speed airflow.

Since the outside of the unit does not get hot, you may place this zone heater anywhere you want and not have to worry about problems that space heaters pose. You can set it and forget it! SUNHEAT—never before has safety, comfort and soft heat been packaged together in such a remarkable heater.

We accept Cash, Checks, Master Card, Visa & Discover.
