 producing a good environment for studying. He would like to see students accept the academic challenges.
 When students graduate, he said, I would like them to feel like they have had a good, effective education, and also enjoy the experience of their school days.
 School will be more structured, Mr. Morrow said. Students will have full schedules, will be required to be at school, and they will not be able to check out as easily. I think it is also important that

students represent the school and community well when they attend all activities. With the privilege of participating in activities comes that responsibility.
Fall sports
 With all the academics worked out for the time being, the students and staff are looking forward to the fall sports season. An open house will be held at 7 p.m. on Friday, August 30, giving fans a chance to see the teams in action.

Homecoming week
