Even though the groundhog predicted more winter, it was the sound of spring when rain was falling Sunday morning.

Conversations on the street concerning the amount of moisture from the rain concluded with the average total being approximately .55 inches in Winona. A light snow fell later in the day and Monday morning dawned with a light dusting on the ground.

It was soon gone and the wind blew a gale all day Monday. Again Wednesday a.m. the landscape was transformed into a ground cover of white; however south Logan Coun-

spent in debate or conversation is another opportunity lost.

If Kansas kids are thinking about school finance, they're probably getting pretty impatient.

The education of young Kansans is not about being a Democrat or a Republican. It is not about the

Governor's plan or the Republican Leadership plan. It is all about the half a million students whose future depends on a quality public education today. It is time to

focus more on doing what needs to be done to solve the funding

problem and less about who gets the credit.

For years the legislature has been playing games while the need for school funding grew to nearly a billion dollars. As a result, one of the best public school systems in the United States dangles by a thread as programs and positions are cut. Teacher salaries have sunk to 41st in the nation and affordable health care grows ever more elusive, making it difficult to attract and retain new teachers and administrators.

Third-grader Susan goes to school in a district that can no longer afford to fill vacancies. Larger class sizes, which offer Susan less attention, have become a reality. Susan and her parents don't care which political party advances a plan but they expect their legislators to make good decisions and to make those decisions

Christy Levings, an elementary classroom teacher in Olathe, is the elected President of the 25,000 teaching, support, student and retired members of the Kansas National Education Association. kneanews@knea.org

here in Kansas? If Carlos and his classmates must wait another two or three years, will they be able to compete for the jobs of tomorrow? Carlos can't wait for a Supreme Court ruling. Carlos needs help now!

For Susan, Carlos and half a million other Kansans, the time to address school funding is now! Our kids are only 7, 10 or 16 years old once. They don't get "do overs."

It is time for an end to the reign of partisan politics. We cannot wait until after the elections or until another court rules. The economic health and security of our great state are at risk. The time for action is now because every day we wait is another opportunity lost.

Call your legislators. Encourage them to stop wasting time and opportunities. Tell them to fully fund our children's public schools!

Kansas National Education Association
