Portability Act.

Moved to tears by the news, she said she could not imagine the difficulty facing American children whose parents are in Iraq.

"The war is so real in Kansas. We are every bit a part of that war," said Oleen, R-Manhattan. "Five soldiers affects hundreds out there."

The deaths also came one day before the one-year anniversary of the first Fort Riley death in Iraq.

Sgt. Jacob Butler, 24, was a scout with the 3rd Brigade of the 1st Armored Division. He died April 1, 2003, at Assamawah, Iraq, when a rocket-propelled grenade hit his vehicle.

About 4,600 Fort Riley soldiers are in Iraq. The five soldiers who died Wednesday were part of the 1st Infantry Division's 1st Brigade, which deployed in September.

Members of the 1st Armored Division and the 937th Engineer Group, which are also based at Fort Riley, were deployed at the start of the war and are scheduled to return to the base through April.

Former Brewster man promoted with patrol

Tod L. Hileman, a Brewster Trooper II. High School graduate and a Kansas

Highway Patrol trooper, was promoted to technical trooper and was assigned as the public resource officer for the Patrol's Troop D in February, said Col. Will

Hileman joined the patrol as a trooper on Aug. 21, 1998, Seek said. He was stationed in Russell County and assigned road patrol duties, he said.

"As Troop D's public resource officer," Seek said, "Hileman will be the agency's media contact for the area and will specialize in safety presentations, child safety seat fittings and recruitment."

During his career with the patrol, Hileman has served on the West Region DUI Strike Force since 1999, served as a pursuit driving instructor since 2000 and served as an advanced forensic mapper since 2001.

He has received three Commander's Commendations for his work and a Distinguished Unit Citation with the West Region DUI Strike Force.

In addition to graduating in Brewster, Hileman also attended He was then transferred to Ellis Colby Community College and County on Jan. 1, 2001 and in studied criminal justice at Barton

Legislature sends enhanced 911 bill to the governor

TOPEKA (AP) — A bill impos- Corcoran. ing a new, 50-cent monthly fee on wireless phones to finance improvements in county 911 systems cleared the Legislature on Wednesday and went to Gov. Kathleen Sebelius.

Proponents of the measure think it could generate \$7.8 million a year for upgrading emergency communications systems, making it easier to locate people who make emergency 911 calls on wireless phones.

Legislative negotiators drafted the final version of the bill. The House approved the compromise, 83-42, and the Senate passed it, 29-

"The governor supports this bill and is glad to see the Legislature working together to get this important safety issue resolved," said Sebelius spokeswoman Nicole tions system.

Currently, personnel in most counties' dispatch centers are shown the number but not the location of a cell phone on which a 911 call is made — information that is automatically provided on calls made from traditional phones. Also, the bill's supporters have said, cell phone calls are sometimes routed to the wrong county or even across

state lines. Under the bill, the wireless fee would be collected starting July 1, with 25 cents remaining in a user's home county and 25 cents going to rural counties with relatively few wireless users.

Counties already can impose a monthly fee of 75 cents on traditional wireline phones to provide money for emergency communica-

Tiahrt supports job push

 $WASHINGTON(AP) - It's not \ regulatory policy, tax policy, health$ high wages that send American manufacturing jobs overseas; it's taxes and regulation and all the other costs of doing business, Rep. Todd Tiahrt told colleagues on Wednesday.

Tiahrt was briefing the House Republican Conference on a series of bills aimed at enticing companies to stop "outsourcing" by making their products in other countries. He said GOP leaders have embraced his package—he calls it "Hire Our Workers," or HOW — and will act on it beginning in May.

"We've been outsourcing jobs from Boeing," he said of the leading employer in his Wichita-area district. "At one time there were 25,000 employees at Boeing Wichita, and we have 12,000 now."

not wages," he said. "The reason is

policy — all these things that have made the environment not conducive to getting a good return on our investment. For example, Tiahrt said an estimated \$1,200 of the cost of each new automobile is based on manufacturers' health care costs.

"If we could figure out a way to streamline or remove those costs, we'd be more competitive," he said. "One CEO told me in Wichita,

Kan., 'If people came to work for free, if wage costs were \$0, I would still have to consider outsourcing jobs," he added.

Tiahrt also mentioned lawsuit liability, energy policy, research and development and trade fairness as issues that drive up manufacturing costs. His package reflects themes frequently sounded by the White "There's a reason for that, and it's House and GOP leadership in Congress.
