Bridge

Covering All the Possibilities

It might be only of passing interest to know how four missing cards of a suit can be expected to divide when declarer has nine cards of the suit. Mathematically, the expectation is that in 100 random hands, the defenders' four cards will be divided 3-1 50 times, 2-2 40 times, and 4-0 10 times.

Declarer might or might not be able to put this knowledge to good use in a given hand, but if he is familiar with these probabilities in a general way, the knowledge can do him no harm, and in some cases will do him a lot of good.

Consider this case where South reached six hearts as shown. He won the opening spade lead and, without giving the matter much thought, led a low heart to dummy's jack. Unfortunately, East showed out, and there was then no way for declarer to avoid losing two trump tricks for down one.

However, if South had initially played the king of hearts, instead of leading low to dummy, he would have made the contract. Whether West took the ace immediately or not, only one trump trick would have been lost. After East failed to follow suit, it would have been a simple matter for declarer to trap West's ten by means of a finesse.

The king-of-hearts lead is demonstrably the right play. It guards against the possibility that either opponent has all the missing hearts, allowing for a finesse to be taken against the ten whenever this turns out to be the case.

Declarer should reason that the contract is a virtual certainty if the opposing trumps are divided 3-1 or 2-2. His only concern should be a possible 4-0 break and how to cater to it.

If East has the missing four trumps, a low heart to the jack would reveal the situation and permit the slam to be made. But since this approach fails if West has four trumps, declarer must protect against that eventuality also. The king play covers both possibilities, and it is therefore the right play.

REALLY

DIFFEREN

"Kittycat has good security."

When Sylvia first learned how to finesse, a whole new world opened up for her. Even though she didn't fully comprehend how finesses worked, that didn't stop her from adopting the newfangled device with all the verve and enthusiasm she could muster.

To illustrate her state of mind in those early days, take this deal where she arrived at four hearts and West led a diamond. East cashed the K-A and continued with the seven, West ruffing Sylvia's queen.

West's jack-of-spades return was taken by the ace, and Sylvia now had to avoid losing a club trick. This did not seem too difficult a task to her, since she planned to resolve that problem by taking a club finesse! Accordingly, after drawing three rounds of trumps ending in dummy, she led the queen of clubs, intending to finesse after East followed low. But East upset the well-known apple cart by covering with the king. After taking the ace, poor Sylvia was surprised to find that she still had a club loser!

Putting this development aside for the moment, she next cashed two more trumps, producing this position:

North	[S]	K 6	6 [C]	10			
West	[S] 10 9	[C]	J				
East	[S]	Q	[C]	92	2		
South	[S]	8	[H]	4	[C]	5	
Whon	Svlvia n	ovt l	od h	or I	aet	tru	m

a next led her last trump, West was forced to discard the nine of spades, allowing dummy to score the last two tricks with the K-6 of spades.

Thus, Sylvia's newest toy proved to be a complete failure when East covered the club queen with king. Be that as it may, it was also clear that she had found the only way to make four hearts - by executing one of the rarest of all plays in bridge, a transfer squeeze.
