Family

Deaths

Eugene S. Fields

Eugene S. Fields, 86, a native Vista Healthcare Center in Wheat Ridge, Colo.

He was born Oct. 30, 1924, in Gustov Larson Fields. The family moved in the spring of 1925 from Ludell to a farm in southwest Rawlins County, where he attended school through the eighth

On Nov. 12, 1944, he married Helen L. Kersenbrock on the family farm. In 1945, his father retired and moved to Colby, and the young couple took over the farm.

In 1971, they moved to Colorado, where he took up remodeling. An excellent woodworker, he made much of the furniture in his house. He moved to Yuma, Colo., in 1988, where he continued remodeling homes until 2001, when he suffered two strokes. He was involved in the Yuma Church of Christ, and the Strasburg Community Church he and his wife moved to Strasburg, Colo., in 2004 to be at closer to family.

After breaking a hip in October, of Rawlins County, died Saturday, he moved to a rehabilitation center Feb. 19, 2011, at the Mountain and then a retirement community, Mountain Vista Healthcare Center, both in Aurora, Colo.

He was preceded in death by Ludell to Henry Axel and Ellen his parents, three brothers, Floyd, Vernon and Glenn Fields, a sister, Anna, and a daughter, Carolyn, age 4, in 1952 from leukemia.

Survivors include his wife, of the home; two sons, Mick (Marlene) Fields, of Strasburg; and Jay (Cheryl) Fields of Wheat Ridge; four grandchildren; four greatgrandchildren; and two greatgreat-grandchildren.

Services will be at 6 p.m. (Central Time) Thursday, Feb. 24, 2011, at the church in Strasburg. A committal service will be at 2 p.m. Friday at the Beulah Cemetery in Colby.

The family suggests memorials to the Mountain Vista Healthcare Center or to the church, in care of Brown Funeral Home, Box 432, Eads, Colo., 81036.

Online condolences may be left www.brownfuneraldirectors.

Claudia J. Patry

formerly of Colby, died Saturday, Hospice in Salina.

She was born April 5, 1946, in Colby, the daughter of Earl and Mildred (Larsen) Jones. Growing up in Colby, she married James Patry on Aug. 21, 1965.

They lived in Wilson for 40 years before moving to Salina to be nearer family. She was a homemaker, a daycare provider and assistant librarian at Wilson High School.

She was a member of St. Wenceslaus Catholic Church in Wilson and its altar society.

Preceding her in death were her parents and a brother.

Survivors include her husband, of the home; two sons, Terry (Donna) Patry, Assaria, and Neal Patry, Salina; two daughters, Carrie (Tracy) Piepho, Bennington,

Claudia J. Patry, 64, Salina, and Teresa (Brandon) Schulze, Norton; two brothers, Newell Feb. 19, 2011, at the Kaye Pogue Jones, Pensacola, Fla., and Richard Jones, Colby; three sisters, Lorraine Kilgore, Chanute, and Kathy Siruta and Linda Kistler, both of Colby; and five grandchil-

Services will be at 10 a.m. Thursday, Feb. 24, 2011, at the church, with Father Jim Hoover officiating and burial in the St. Wenceslaus Cemetery.

Visitation was to be from 8 a.m. to 6 p.m. today at the Foster Mortuary, Wilson, and from 6 to 8 p.m. at the church with the family present. A vigil service will begin at 7 p.m.

The family suggests that, instead of flowers, memorials be made to the hospice or the library, in care of the mortuary, 610 24th St., Wilson, Kan., 67490.

Polish stunt cyclist conquers Spanish skyscraper

MADRID (AP) — A Polish stunt cyclist has hopped up 921 name," he said with a chuckle. steps to the top of Europe's tallest Herba said he has been cycling Someplace special will be to the phrase "taking the stairs."

Krystian Herba said it took him 19 minutes and 27 seconds Wednesday to get to the peak of the 614-foot (186-meter), 52-story Gran Hotel Bali in the eastern Spanish resort city of Benidorm.

Herba does not pedal but rather bounces his way up, taking usually two steps at a time but sometimes three. He told The Associated Press that the journey went perfectly, saying "I am tired but very happy.'

Hotel guests, onlookers and TV crews lined the staircase as Herba said. ascended.

Home Sweet Home

after years of not being able to keep up with my house and yard, I knew there had to be an easier way. After a visit to Fairview Estates, I knew that kind of apartment living was for me. It felt like home! No cooking and even a garage for my car. I picked out an apartment and moved in. My family lives close, and I get to see my grandchilds!

Use Roundup Ready alfalfa wisely

After years of waiting, Roundup Ready alfalfa has again been approved for planting. Farmers will have to consider the opportunities and risks of using this crop.

We all know Roundup is effective on many types of weeds, but we do have other good herbicides and weed control practices for alfalfa. Where might Roundup provide a special

One area might be at establishment. While we do have other good herbicides, they all cause some crop injury as they kill weeds. Roundup causes less injury, so stands should develop faster.

Troublesome weeds like waterhemp and thistle, curly dock and dandelions might finally meet their match with Roundup. Winter annual weeds can be controlled easily with Roundup, which might be useful if you typically wait too long in the spring to use other herbicides.

Roundup Ready alfalfa also will carry some risks, however. For one, seed will be more expensive and it might be tempting to spray more often, so you might end up spending more on your alfalfa. Unless you also get more yield or higher prices, it may not pay.

We also run the risk of developing glyphosate-tolerant weeds more rapidly, especially as we only use Roundup on all crops.

Some customers won't buy genetically engineered crops like Roundup Ready alfalfa. Plus, you could contaminate conventional alfalfa fields being grown to try and take advantage of this specialty area. Finally, yield drag isn't supposed to occur but independent field testing cannot confirm that at this time.

Genuity Roundup Ready alfalfa varieties are available to plant this spring. Are they right for your operation? Read on for some factors to

It will be easy to control most weeds in al-

 Knowledge for Life

falfa that tolerates Roundup. But just because it's easy isn't a reason to buy these varieties. Some growers don't need this trait. For example, I encourage many of you cow-calf producers to plant alfalfa-grass mixtures in your hay fields. Since Roundup will kill the grass, conventional varieties are more appropriate in these situations.

We must also realize that controlling weeds in alfalfa does not always increase hay tonnage. Weeds can boost yield, and sometimes weeds can be acceptable feed. So spending time and money to kill weeds in alfalfa isn't always worthwhile.

Another example is planting oats with the alfalfa and later harvesting the oats for either hay or as grain and straw. Roundup can't be used in this situation until after the oats have been harvested. If a good stand of alfalfa is present after oats has been harvested, further weed control may not be needed.

Not everyone has problems with weeds in alfalfa. This often is true if alfalfa fields usually are rotated to a different crop after three or four years. If a good stand can be established using other options, weeds often do not become a big problem until stands get older and start to thin out.

Don't forget – it will cost you \$2.50 more per pound of seed to get this new trait. So make sure easier weed control is really worthwhile to you before you make this investment. farmers and ranchers.

Roundup Ready alfalfa is here. If you decide to use it, use it wisely.

Alfalfa is a hungry crop. Proper fertilizing in spring often is needed to feed alfalfa so it will

produce profitable yields. How much fertilizer should you apply? With increasing fertilizer costs and strong competition from other crops, the only way to answer that question intelligently is to first get a soil

Soil tests tell you the amount of each nutrient your soil can provide to your alfalfa plants. Then we can determine how much more fertilizer, if any, should be applied for maximum

profits. Remember that alfalfa gets most of its nitrogen from the air if the plant roots are wellnodulated. Usually you are just wasting money and fertilizer if you apply nitrogen. However, all other nutrients must come from the soil or from fertilizer. Many soils in our region provide high quantities of most nutrients, but very few provide all the nutrients needed for top al-

falfa yields. So fertilizer often is needed. Collect soil samples as soon as frost is gone from existing alfalfa fields and also from fields you expect to plant to alfalfa this spring or next fall. Send these samples to a lab for analyses of phosphorus and soil pH. If your field is sandy, eroded, or highly weathered, also test for potassium and sulfur.

Most important of all, use the results of these tests, with advice from your Extension agent and fertilizer dealer, to develop a fertilizer program designed for your conditions. Better alfalfa profits will be the result.

Corrections

There were a couple of mistakes in an article, "Foundation marks 10th anniversary," on Page 1 in the Monday, Feb. 21, edition of the Colby Free Press. The \$300,000 raised by the original members of the Thomas County Community Foundation board, plus a matching \$300,000 from the Kansas Health Foundation, were used to get the foundation started, not for creating a permanent endowment, said Executive Director Melinda Olson. The foundation has given out \$300,000 since its inception in 2001. The foundation has 12 board members, plus two at-large members, Nancy LePell and Quintin Flanagin. These were
