In the 400 meters, Zach Brown ranks 17th with 49.21 in 2001.

Jeff Oelke ranks 14th in the 1,600 with a run of 4:22.60 in 1985.

The boys 2001 relay team ranks 17th in the 400-meter relay with 43.20 and the 1984 team ranks 12th in the 3,200-meter relay with 8:01.50.

## Statewide campaign aims to stop aquatic hitchhikers

The Kansas Department of Wildlife, Parks and Tourism has launched a statewide campaign, Stop Aquatic Hitchhikers, to educate Kansans about the environmental and economic threats that aquatic nuisance species such as zebra mussels and Asian carp pose to the state.

Aquatic nuisance species are animals and plants not native to Kansas that can threaten lake and river ecology, harm native or desirable species and interfere with our economy. They often hitchhike with unsuspecting people or their equipment, so an informed, watchful, public can help protect Kansas waters.

Stop Aquatic Hitchhikers features an animated Asian carp hitching a ride in a boat and includes a new website, ProtectKS-Waters.org, plus billboards, print advertisements and television and radio spots. It aims to alert the public about the threat of these species and encourages people to go to the website where they can learn more about the problem.

that these nonnative species may affect them even if they don't fish or boat," said Jason Goeckler, co-Nuisance Species Program. "Zebra mussels will attach themselves to anything below the water line. In addition to damaging boating of exotic species, the Kansas and fishing equipment, they'll foul rocky shorelines with their sharp, dime-sized shells, making it hard effective Jan. 1 that prohibit the to walk or wade along the shore. Also, they can clog water intakes and damage power-generating fa-

### Former cyclist faces charges from U.S. Anti-Doping Agency

AP Sports Writer AUSTIN, Texas – Lance Armstrong is facing more doping allegations just a few months after he thought he had finally put them

Although federal investigators in February closed a two-year investigation without bringing criminal charges, the U.S. Anti-Doping Agency has filed new doping charges that could strip the seven-time Tour de France winner of his victories in cycling's pre-

"I have never doped, and, unlike many of my accusers, I have competed as an endurance athlete for 25 years with no spike in performance, passed more than 500 drug tests and never failed one," Armstrong said in a statement.

The move by USADA immediately bans him from competing in triathlons, which he turned to after he retired from cycling last year.

Armstrong has been dogged by doping allegations since his first Tour victory in 1999, but had hoped his fight to be viewed as a clean champion was finally won after federal prosecutors closed their probe. Armstrong has said the investigation took a heavy emotional toll and he was relieved when it ended.

But USADA officials insisted they would continue to pursue their investigation into Armstrong and his former teams and doctors, and notified him of the charges in a 15-page letter on Tuesday. Unlike federal prosecutors, USADA isn't burdened by proving a crime occurred, just that there was use of performance-enhancing drugs.

In its letter, USADA said its investigation included evidence dating to 1996. It also included the new charge that Armstrong blood samples taken in 2009 and 2010 are "fully consistent with blood manipulation including EPO use and/or blood transfusions." Armstrong came out of his first retirement to race in the Tour de France those two years.
