School start changes reading times

Today is the first day of school. Everyone had to be up early and get out the door on time this morning. No more sleeping in and staying up late. Now we have a more regimented schedule to follow. This means you may have different reading schedules for yourself. Because the children are in

school, maybe you can catch a little more time to read. But if you drive your children to their activities, you may need to take that good book, audio CD or magazine with you on the run. You may want to snatch some reading time in between events.

With school starting, remember

The first book I'd like to tell

"The Husband List," a mystery and love story set in 1894. People in New York were making money; families with old established reputations and fortunes were being confronted by the new wealthy. Protagonist Caroline Maxwell is from a family that is part of the firmly established rich. Her mother has plans to marry off Caroline to Lord Bremerton. Caroline however has other plans. You will enjoy the relationships and intrigue that are developed.

The next is "The Husband's Secret," by Liane Moriarty. This book brings suspense in a captivating story. In her newest book, Cecilia finds a letter, addressed to
