## Kansas' earliest CSI story

### Fingerprint ends nationwide '20s manhunt

True crime from the roaring 20s, "The Fleagle Gang, Betrayed by a fingerprint," begins with a brazen daylight bank robbery of the First National Bank in Lamar, Colo. on May 23, 1928. Four men died, and the robbers escaped — until forensic science caught up with them through a fingerprint.

The bank robbery and national manhunt story was big news more than 75 years ago. We found recently the old time radio program "Gangbusters" aired a program on Jake and Ralph Fleagle in 1937. There are many old stories about the crime, but none cover the events like this book. Great for true crime history buffs.

The book includes over 100 photos and maps taken from court files and places where the gang robbed banks and scenes where the murders took place of the doctor and cashier.

Author Tom (N.T.) Betz, editor of *The Goodland Star-News*, has spent more than 45 years in journalism and living on the Great Plains.

"The Fleagle Gang" details the robbery/murder case which hinged on a single fingerprint found on a murdered Dighton, Kan., doctor's car. The fledgling FBI plays a crucial role in turning the fingerprint into solid forensic evidence used to find, arrest and convict members of the Fleagle Gang. The FBI credits the Fleagle case as the first time a single fingerprint was used to identify and convict criminals. The Fleagle Gang robbed banks in Larned, Kinsley, Marysville, Ottawa and McPherson Kan., Lamar, Colo., Eugene, Ore., and countless others of over \$1 million in the 10 years they operated.
