# Access to health care big problem for people

faced by all Kansans is cost and access to health care.

If insurance was less expensive, more people and small businesses would purchase coverage, but in tight times, keeping your coverage can be tough if you lose your job or can't afort to pay.

Last week, we passed House Substitute to Senate Bill 81, the Health Care Reform Act. It begins to address the need for prevention and early health interventions, and improves portability and coverage for those who face losing their

Employees of large business-

es may deduct health insurance tax deduction. from their income taxes, saving 15 percent or more. Unfortunately, employees of small businesses, especially sole proprietors, don't get the same break unless they create a complex plan called a 125 plan.

simple for thousands benefits from \$1 to \$3 million. of small businesses to save 15 percent or more by requiring insurance companies to offer a cheap and simple way to use the

Many Kansans face losing their insurance coverage because of a job loss or illness. This bill improves the portability of insurance and protects Kansans who lose their insurance by extending the state continua-The Kaiser Foundation estimates tion policy from six to 18 months that 60 percent of Americans don't of optional coverage after leaving It establishes the Premium Assis-

savings. We made it able Kansans by increasing lifetime families (up to 50 percent of federal far enough. Something is better than

Thousands of Kansans have little or no health insurance. This forces many to emergency rooms and passes on the costs to those who do have coverage. It is clear our state's health care system must be reformed for the good of all Kansans.

Thousands of uninsured Kansans struggling to make ends meet will get the coverage they need. The House bill will help insure more Kansas children by requiring new efforts to enroll those eligible for programs for low-income families.

poverty level) get the help they need to afford health insurance.

When it comes to prevention and early health intervention, the bill increases cancer screening available at Safety Net and rural clinics.

It will improve the health of poor expecting mothers by expanding Medicaid and providing dental care and stop-smoking programs

House bill.

I actually was one of several voting against it because it does not go jmorriso@ink.org

nothing, though, and, hopefully, we will look at the true problem in cost, which is lack of competition and openness (transparency) of the charges made by providers and suppliers in the monopoly we call health care.

Thank you all for your support, feedback and prayers. It truly is an honor to serve as your legislator.

# take advantage of this 15 percent a job. This bill also helps uninsurtance Program so the poorest Kansas Implement dealer operating new satellite system for agriculture

By Casey McCormick

scmccormick@nwkansas.com Agriculture technology continues to advance, and one example is the development of a new satellite system being operated through an area John Deere implement dealer.

Goodland Greenline of Goodland and Wheeler has already positioned three base stations on towers in northwest Kansas and has two more on the way. This will make the Real Time Kinetics system available for Matt Breininger, Greenline's

agriculture management solutions consultant, has spent the last two months getting the network up and He sees advantages of the system

over the typical global positioning system signal. "The kinetics system sends a

differential correction to the tractor eliminating global drift, where as your traditional signal does not,"

With the current technology, a farmer sets his A-B line, which gives the auto tracking a base to go off of. But, as the earth rotates, this line will change/drift since satellites move faster than earth.

With the kinetics system, the differential allows for 1-inch or less accuracy in the field.

"It doesn't matter if it's two hours, two days or two years later, those lines don't change," Breininger

A farmer can leave the field he is working on, then return and the lines will not move.

The three towers in place now are at Ruleton, Goodland and Brewster, all in Sherman County.

The next two base stations will be placed in McDonald (Rawlins County) and in southern Cheyenne

These will be operational by mid-April. Each tower will send out and activation. signals up to 12 miles.
