## PUBLIC NOTICE

### DRINKING WATER WARNING

City of Goodland, Kan. water has high levels of nitrate  
Quarterly Water sample results collected 3/31/08 showed nitrate levels of 11 mg/L. This is above the federal nitrate standard, or maximum contaminant level (MCL). Nitrate in drinking water is a serious health concern for infants less than six months old. DO NOT GIVE THE WATER TO INFANTS UNDER SIX MONTHS OLD OR USE IT TO MAKE INFANT FORMULA

What should I do?  
• DO NOT GIVE THE WATER TO INFANTS. Infants below the age of six months who drink water containing nitrate in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome. Blue baby syndrome is indicated by blueness of the skin. Symptoms in infants can develop rapidly, with health deteriorating over a period of days. If symptoms occur, seek medical attention immediately.

• Water, juice, and formula for children under six months of age should not be prepared with tap water. Bottled water or other water low in nitrates should be used for infants until further notice.

• DO NOT BOIL THE WATER. Boiling, freezing, filtering, or letting water stand does not reduce the nitrate level. Excessive boiling can make the nitrates more concentrated, because nitrates remain behind when the water evaporates.

• Adults and children older than six months can drink the tap water (nitrate is a concern for infants because they can't process nitrates in the same way adults can.) However, if you are pregnant or have specific health concerns, you may wish to consult your doctor.

What happened? What is being done?  
• Nitrate in drinking water can come from natural, industrial, or agricultural sources (including septic systems and run-off). Levels of nitrate in drinking water can vary throughout the year. We'll let you know when the amount of nitrate is again below the limit.

• You were initially notified of high nitrate levels on 3/20/07. Since that time we have been monitoring the nitrate concentration every three months. We have placed Well #3 on inactive/emergency status to be used in emergency situations such as fire fighting and drought until further notification. Note that prior to 2007 we were meeting drinking water standards for nitrates on Well #3 and #12.

For more information, please contact Wayne Hill, City Manager or Rich Simon, Superintendent of Public Works by phone at 785-890-4500 or by mail at 204 W 11th, PO Box 59, Goodland, KS 67735.

**Always Think Safety First.  
call 811 Before You Dig.**

## Planning those outdoor projects?

Aquila reminds you to call the national 811 Call Before You Dig line at least two working days before you plant a tree, build a fence or begin any project where you might dig into underground utility lines.

This **free service** will ensure that the location of any underground lines and facilities is clearly marked. Don't take chances.

A single call to Kansas DIG SAFE will help you avoid potential expense – and the possibility of serious or fatal injury. For your own safety, remember to call before you dig.
