Monday was the first day for practice for the Cowgirls volleyball team. The girls practiced serving and passing while Coach Jerry McKee watched to see what shape his team is in for the season. See story, photo on Page 12

Rain relocated relay exceeds goal

By Tom Betz

ntbetz@nwkansas.com The high school track was empty Friday evening, but the Memorial Union at the nearby Northwest Kansas Technical College was filled with more than 250 people for the rain relocated Sherman County Relay for Life.

Jessica Kannady said the decision to move the relay inside was made late Thursday, and the committee members worked hard to get everything moved into the student union on the college campus.

She said the Relay for Life raised \$48,455 this year despite the rain, which was more than the goal of \$42,000. Last year the relay raised more than \$45,000.

District representative for the American Cancer Society Jennifer Van Eaton of Colby said she was impressed with how well the Sherman County committee had coped with the change in plans on such a

"I couldn't wish the rain away," she said, "we need it too much."

Van Eaton praised the Sherman County people for their fantastic efforts in helping to raise money for cancer research, and said she was proud that Ashley Kear of Goodland has been selected as one of two Heroes of Hope Profiles of Courage program from Kansas.

Kear was presented with a special gift and received a standing ovation from the crowd.

The large north room at the student union was filled with people and special projects by several teams were along the walls with the center covered by at least three rows of luminaries plus almost as many stretching out into the student cafeteria area where the registration desk was.

Not to be out done the Kiwanis had a tent set up on the south side of the building where Chief Ray Smee and Brad Schields were busy cooking hot dogs and hamburgers. Kevin Rasure was out in the cook tent helping keep the patties coming for the cooks.

The Kiwanis set up their serving in the meeting room, and it was busy most of the evening.

where the re-

lay was moved

because of rain

showers.

McCants spoke first and said he wanted to thank everyone who had sent messages, cards and expressions of support during the past

'Cancer and this event do bring the community together," he said.

McCants said he went to the health fair and got a call from Dr. Mo Schafei when the PSA (prostatespecific antigen) test spiked. He said Dr. Schafei did lots of tests, and at first he said it might not be a big problem, but two weeks later he called and said it was real bad.

"Two weeks later I was in Houston to get a second opinion," he said, "and by Friday I did not have a prostate.

"I had lots of support, and there was not a chance I was not going

Sen. Brownback tours energy center

By Tom Betz

ntbetz@nwkansas.com The last stop on a 10-county tour of northwest Kansas brought Sen. Sam Brownback to the Goodland Energy Center on Wednesday afternoon to see how the ethanol and power plant projects are doing

He left promising to do what he could to get a loan approved to help finish the power plant.

Alan Townsend, a farmer who is president of the ethanol plant board; John McCullough, an engineer with JMC Engineering; Larry McCants of First National Bank; Steve West of Western State Bank and Jan Kohut, project manager for JMC, took Brownback, his son Mark and daughter Jenna, for a tour of the two plants along with State Sen. Ralph Ostmeyer and Dennis Mesa from Brownback's office.

The senator said the project had come a long way since his last visit, and asked how each plant was do-

McCullough said the ethanol plant is getting closer to operation. He said some tanks have to be finished and the boilers have to be installed to fire the plant.

As he showed the group through the plant, he answered questions and showed how much progress has been made in getting the plant

Brownback asked about the prospects for success for the plant with the higher price of corn, used to make the alcohol fuel.

Sen. Sam Brownback (center) and his two children Mark (left) and Jenna listened to John McCullough (right) engineer from JMC Engineering and Jan Kohut (left), project manager, talk about the status of the power plant during a tour of the Goodland Energy Center on Wednesday.

McCants said the plant is efficient that he believes a good portion of completed, and things are getting enough it should make money, and that once the power plant is finished its waste steam is added in, the ethanol plant should do even better.

He said the smaller size of the plant makes it more efficient, and said that most of the inside work is

the ethanol produced will be sold in closer to making the plant opthis area. He said the plant is posi-erational. He said he hopes that will and the extra efficiency from using tioned where it can sell the finished happen later this year. product to oil companies in all four directions.
