

Cowgirls face winds at Syracuse tournament

3A Regional tourney Monday at Syracuse

The Cowgirls final golf tournament of the regular season was at Syracuse on Thursday, and the day was windy.

"It was one of those days when you wish you were at school," said Coach Connie Livengood. "It was a miserable day to play golf, but there were some great performances from some teams today, despite the 50 mph winds."

Syracuse dominated the tourney, they shot a 375 to win.

The Cowgirls shot a 432, but it was good experience.

Jazz Weis placed seventh shooting a 97.

Cortney Cowan placed 13th shooting a 107.

Emily Purvis had a 111.

Megan Siruta had a 117.

Jordan Knitig had a 118.

"I feel the girls could have been more focused," Livengood said.

"Playing in the wind is difficult, but

not if you problem solve and believe you can play in the wind.

"A player must commit to their shot and game in order to succeed in any tournament, but especially in 50 mph winds.

"The girls had an experience they will hopefully learn from and remember some of the things they need to correct.

"If I had to pick out a player today who played good, but didn't place, it would be Emily Purvis. I feel as a freshman she played very well for the conditions and she played right around her handicap.

"I believe our team will do better at regionals."

The Cowgirls were to return to Syracuse on Monday for the 3A Regional Golf Tournament, and Livengood is hoping they play well enough to take the whole team back to the state tournament.

Cowgirl Emily Purvis putts in the wind at Syracuse on Thursday. She played well, but was just out of medal with a 111.

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!
