Why you can't grow the store's baby carrots

vkmelia@yahoo.com So you head down to the supermarket, and on your grocery list, usually added as an afterthought, is carrots. Yeah, carrots. Remember them? Carrots are those little two inch long orange things in the fresh produce department that are displayed in 1 or 2 pound plastic bags, and really taste good!

You quietly wonder why you can't seem to grow those little beauties in your backyard garden that are so uniformly perfect and you are grateful to the commercial carrot grower for his ability to do so. They are so perfect for those holiday trays

melia

the gardener

of dippers.

You have been misled. Those beautiful little carrots were harvested at full size and then machine trimmed into their perfect baby shape. They are indeed tasty. And sooo handy. No need to get out the potato peeler or the paring knife and spend a half hour cleaning them up. Say goodbye to all that good healthful outer fiber that was peeled away

used for other foods or

I suppose the discovery of "baby carrots" is a good thing. If their appearance or taste entices you to buy a bag of

them, that's good, because most of us don't eat nearly enough carrots. They are literally jam-packed with A single (full size) carrot contains

enough beta carotene for our bodies to manufacture all our vitamin A needs each day. Despite the carrots

most it is saved and nearly 70% of all backyard garden- in late fall when fly maggots bur- varieties are of the Nantes type since ers grow a few of them each year. I think that's good evidence that most of us are aware of the carrots dietary value.

Unfortunately, carrots aren't the easiest vegetable to grow. The seed is very slow to germinate and must be planted in a very shallow mode, else they may never emerge. And they must be kept damp until they sprout. Carrots need a deeply worked, fine soil in which to thrive. If the ground isn't well worked, the growing root may show deformity and grow in strange shapes which rather benign ability to draw much certainly won't hurt their taste. ally smaller, which I prefer.

rust into northwest Kansas.

Finally, this is just an early warn-

ing and is not a cause for alarm. It is

just important that everyone know

in the process, although attention to our shopping routine, Insects seldom bother them, except row into the roots and render them

> As with several other garden vegetables, the seed of the carrot is difficult to sow evenly, and despite our best efforts, we plant it too thickly. It then becomes absolutely necessary to thin out some of the plants as they grow, else the spindly plants will not mature into good size.

Basically, there are two types of carrots, one called Chantenay, and the other. Nantes. The Chantenay grow long and slender, while the Nantes types are shorter and gener-

from rust. Wheat is normally treated

when the flag leaf is at least 2/3

emerged. This is because fungicides

for fungicide applications to protect leaf in the plant.

Most of the newer introduced the shorter root seems to thrive well in shallow worked soils.

A newer Nantes type carrot that I think raises the bar for quality, sweetness and growth habit, is one called Yaya. Yayas are smooth, offer good bright orange color and have great carrot flavor. One more thing... when you buy your carrot seed, always look for pelleted seed. It's so much easier to handle.

Plant a short row of carrots this year. Forget about the manufactured baby carrots at the supermarket...if you can.

sion Office or at the Experiment Sta-

Stripe rust thrives in same environment as wheat

els of rust in the pan-

handles of Texas and

Oklahoma. These are

usually the areas that

Stripe rust is a challenging wheat disease because it thrives in the same environment that wheat thrives. These conditions include moderate temperatures with moisture.

The following is a report from Erick DeWolf, Kansas State wheat pathologist.

"I continue to get reports of low levels of stripe and leaf rust in Kansas. Reports to date have come from primarily south central and central regions of the state. Counties where stripe rust has been reported include: Harper, Kingman, Sedgwick, Pratt, Reno (south central); McPherson, Saline (Central). The wheat in these areas of the state ranges from flag leaf emergence to heading, which is approximately

jeanne

extension district

development. Weather conditions this week have been favorable for continued spread and development of rust diseases."

With the storms that moved through the area in the last couple weeks, they circulated in a counterclockwise direction. This could move rust spores from central Kansas to western Kansas. This is a bit of a deviation from the normal south to north movement of the rust spores on the wind currents. There 2-3 weeks ahead of normal crop have also been reports of trace lev-

Rachel and William Linin

Couple married at Methodist church

Springs, S.D. and William Maurice of the bride. Linin of Goodland were married at 3 p.m. on Saturday, Nov. 19, 2011, at the Goodland United Methodist Church in Goodland with the Rev. Matthew Linin and the Rev. Dustin Petz officiating.

The bride was escorted down the aisle by her father. She wore an A-Line white satin gown with a beaded bodice and chiffon overlay. With the continuation of a family tradition, the bride also wore her great-grandmother's diamond engagement ring making this the fifteenth family wedding at which it was worn. Her bouquet was dark pink roses, Berbera daisies and white calla lillies.

The matron of honor was Jodie Lim of Lakewood, Wash., and the maid of honor was Jenna Georgeff of Hot Springs, S.D. The bridesmaids were Leah Kunnari of Hot Springs, S.D. and Aryn Sturgeon of Omaha, Neb. The flower girls were Eliana and Adrianna Sowers, nieces

The best man was Thomas Romero of Broomfield, Colo. The groomsmem were Nathan Linin and Joel Linin, brothers of the groom and both of Goodland, and Craig Stokebrand of Salina. Ushers were Josh Sowers and Nathan Sowers, both of Bird City and Jordan Sowers

Rachel Elisabeth Sowers of Hot of Oklahoma City, Okla., brothers

The bride's attendant was Caitlyn Mosset of Hot Springs, S.D. Sara Sowers, sister-in-law of the bride of Bird City, was the guestbook attendant and the program attendent was Hannah (Sowers) Gomez, cousin of the bride, of Southland, Texas.

The pianist was Tifany Glasco of Bird City and vocal music was provided by Bethany Bigler of Custer, S.D., and Brian and Janda Linin, cousins of the groom of Goodland.

The parents of the bride are Daniel and Lori Sowers of Bird City and the granddaughter of the late Raymond and Sharon Schlup of Springfield, Colo., and the late Lew and Audrey Sowers of Bird City.

The parents of the groom are Max and Brenda Linin of Goodland and the grandparents are the late William and Esther Linin of Goodland and the late Maurice and Joye Wit-

The groom has a Bachelor of Science in construction science and management from Kansas State University at Manhattan and the bride has a degree in Christian education from Cornerstone Bible Institute in Hot Springs, S.D. After a honeymoon in the Dominican Republic, the couple will live in Goodland.
