

How to Survive a Tornado!

TORNADOES CAN KILL

Although most tornadoes strike during the spring and summer months, it is important to realize that they can occur anywhere at anytime. The winds of the tornado can reach speeds of 300 mph, and at these speeds neither man nor nature make many things that can hold together. The one thing to remember about tornadoes is that they will go where they want. **GET TO SHELTER IMMEDIATELY!** With this in mind, the best place to go is underground, or as underground as possible to avoid the winds and flying debris that can kill.

NOAA WEATHER RADIO

Broadcasts National Weather Service warnings, watches, forecasts and other hazard information 24 hours a day. The hearing and visually impaired also can get these warnings by community weather radio with alarmtones to other kinds of attention getting devices like strobe lights, pagers, bed shakers and text printers.

BE PREPARED!

No matter where your shelter is, you should have a few basic supplies there. Since most tornadoes occur at night, you should have spare clothing, underwear and shoes, sleeping bags and blankets are also good. A portable radio and/or weather radio and a flashlight are a must. Fresh drinking water and food are helpful, as well as a few tools to help you dig out in case of collapse.

Once you determine where your shelter is going to be, practice getting there. Practices should be held by the entire family at least once before the tornado season begins and then again during the summer. The more you practice, the faster and more safely you will get to shelter. Since most tornadoes occur at night and usually take out power lines, more than likely your home will be dark. You are less likely to get hurt if you are going someplace you have been before.

GET TO SAFETY THE HOUSE

The safest place in the home is the basement and the safest place in the basement is in a corner. If no corner is available, an outside wall is the next best location.

One basic rule that should be followed is to **AVOID WINDOWS**. Flying debris can kill and the worst kind of flying debris is broken glass.

For added protection, get under something strong, such as a workbench or heavy table. If possible, cover your body with a blanket or sleeping bag. Protect your head with anything that is available.

Another safe place in the basement is underneath the basement stairway. Stairways are structurally sound and are usually a safe place to be, especially if they are along an inside wall. No matter where you seek shelter, you should avoid being underneath heavy objects such as refrigerators, washing machines, or pianos.

OUTDOORS

If you are trapped outside get as low as possible. Remember, your best chance for survival is to get away from the killing winds. Do not stand up and watch the tornado.

Seek shelter in a ditch, gully, or culvert. Even just a low spot in the ground is going to give you some protection.

Do not get into a grove of trees. Remember to protect your head.

LONG SPAN BUILDINGS

Long span buildings are especially dangerous because the entire roof structure is usually supported solely by the outside walls. When the tornado approaches, the strong winds knock out the supports and the roof collapses. Some examples of these types of buildings are: civic centers, arenas, memorial buildings, theaters, shopping centers, grocery stores, swimming pools and gymnasiums.

MOTOR VEHICLES

The least desirable place to be during a tornado is in a motor vehicle. Cars, buses and trucks easily become flying missiles in a tornado.

Never try to outrun a tornado in your car.

Stop your vehicle and get out. Seek shelter. Try to get into someone else's basement. Do not get under or next to your vehicle; it may roll over on you.

MOBILE HOMES

During a tornado, one of the least desirable places to be is in a mobile home. The winds knock the home from its foundation, rolling it along the ground and breaking it apart. If you are in a mobile home when a tornado approaches, seek other shelter immediately.

Seek shelter on foot if possible. **DO NOT DRIVE YOUR CAR!** Do not get under a mobile home!

Plan ahead if you live in a mobile home. Make arrangements with friends or neighbors that have basements.

— Always Be Prepared
— Listen to Watches and Warnings
— It's Up to **YOU** to Seek Shelter Before a Storm Arrives
It could be the most important decision you will ever make

THE NORTON TELEGRAM
215 South Kansas Avenue, Norton, KS - Phone 785-877-3361

Can YOU tell the difference?

Severe Thunderstorm Watch
Severe thunderstorms are likely to occur.

Severe Thunderstorm Warning
Severe thunderstorms have been spotted, and people in the path of the storm are in danger.

Tornado Watch
Tornadoes are possible in the area.
Stay tuned to the radio or TV and watch the sky.

Tornado Warning
A tornado has been sighted. Take cover at once.

Be aware of weather around you and listen to watches and warnings!
Post this where you can see it when severe weather occurs

FROM THE
Norton County Sheriff's Office
Emergency - 911 • Administrative - 785-877-5780
Norton County Emergency Preparedness

BE ASSURED
the Norton County Hospital will be there in Case of an Emergency

NCH

The Norton County Hospital has implemented a plan which would become effective once notified by the Emergency Preparedness Team.

Norton County Hospital would continue to function in a full or limited capacity to offer:

- EMERGENCY SERVICES —
 - Primary Triage-Emergency Care
 - Secondary Triage-Advanced Care
 - Walking Wounded Care-Non Critical Care
- LAB WORK •X-RAY •LIMITED ELECTIVE SURGERIES

FOR MORE CRITICAL CARE UNTIL CRISES WAS OVER

Norton City Sirens

TAKE COVER: An oscillating tone 8 times means take cover - a tornado has been sighted.

ALL CLEAR: Oscillating tone 4 times means all clear, danger is past.

Sirens blown one time means a call for Rural Firemen
Sirens blown two times means a call for City Firemen.

Turn to KQNK Radio FM 106.7 or 1530 AM. For those who live in the country, the radio station will sound the alert. The sirens are an outdoor warning device. If you are indoors you will need a battery operated radio to hear the all clear alerts and further weather information.
