

# Meals on Wheels gives August schedule

The schedule for Meals on Wheels for Aug. 2 through Aug. 29 is as follows: Aug. 2 – Aug. 8, St. Francis Altar Society, contact, Tina Silan (877-5128); Aug. 9 – Aug. 15, Redeemer Lutheran Church, contact, Cynthia Washburn (877-3044); Aug. 16 – Aug. 22, (1) Midwest Energy, Contact: Curt Luehrs (877-5487), (2) Norton FSA Office, contact, Nancy Hager (877-5156), (3) Norton County Hospital, contact Alice Hawks (877-3145); Aug. 23 – 29 Immanuel Lutheran Church, contact Fonda

Lawrence (877-3145). It is important that each group have 3 persons, each with their own car, to deliver the noon meal. Volunteers should report at 11:30 a.m. for the noon delivery. Meals are to be delivered each Monday through Sunday. Be sure to turn in the list of volunteers to Alice Hawks at the hospital by Friday of the week before your group starts their delivery.

## Kansas Highway Patrol troopers check school buses for safety

With the first day of school quickly approaching, Kansas Highway Patrol troopers are assisting school districts throughout the state in assuring that students arrive to and from their destinations safely. Troopers are inspecting school buses from now until the beginning of the school session to make sure the vehicles will load, transport, and unload students safely. Buses and other vehicles throughout the state are also inspected for

compliance with safety regulations.

“Checking school buses for safety and to ensure there are no vehicle defects is a task we handle every year in order to keep Kansas children safe,” Patrol Superintendent, Colonel Terry Maple said. “Kansas parents expect their children to be kept safe while they are at school, and that should not be limited to the classroom.”

Thousands of school vehicles’

equipment and mechanical conditions will be checked as troopers visit each school district. A bus that passes the inspection will display a green sticker of approval in the corner of the windshield. Buses that do not comply with safety regulations cannot be used to transport students until all defects are corrected and a trooper rechecks the vehicle. In 2009, 9,409 buses were checked by the Kansas Highway Patrol for defects.

## Cattle at a disadvantage on some hot summer days

Mary Lou Peter  
mlpeter@ksu.edu

Compared to people, cattle have a distinct disadvantage when it comes to handling some kinds of heat. Soaring temperatures and high humidity are taking a deadly toll, a Kansas State University veterinarian said. “Cattle lack the ability to sweat significantly, so it is critical that producers and livestock handlers take steps to reduce heat stress before conditions become dangerous,” said K-State Research and Extension veterinarian Larry Hollis. “High daytime temperature by itself rarely causes problems. It is a combination of the humidity with heat that creates the maximum heat load on cattle.”

He cited this month’s reports in Kansas of hundreds of cattle deaths attributed to the weather mix. Temperatures well into the 90 F range coupled with high humidity levels push heat indexes to 105 degrees or above.

Other factors compounded the cattle’s lack of ability to perspire. Several days in a row of high temperatures, a lack of nighttime cooling, lack of shade or cloud cover, lack of wind, lack of air movement in pens, and grazing on endophyte-infested fescue pastures can all create problems for cattle, Hollis said.

In addition, animals with dark hides and/or heavy body weights, as well as those in advanced stages of pregnancy are particularly vulnerable to the consequences of such weather.

“Producers should watch for signs of heat-related distress during hot, humid weather. The signs

can include cattle going off feed, standing with their head over the water source, panting, salivating excessively, or open-mouthed breathing,” he added.

Producers and feedlot managers should consider ways to alleviate the stress, when possible, including:

Avoid gathering or working cattle after mid-morning; Provide access to abundant cold water/waterer space and make sure the water flow rate is adequate; Provide access to shade; Provide the ability to move away from anything that reduces airflow, even cutting down weeds around pens; Use sprinklers to wet the skin; Control flies; Make arrangements with fire department; and, don’t forget about the people,” Hollis added.

A string of hot, humid days through much of the Plains and Midwest this summer have taken a toll on cattle, according to Hollis. To help cattle producers and feedlot managers determine the risk of such conditions, the University of Nebraska developed a Temperature-Humidity Index. The index is part of a Livestock Weather Hazard Guide, posted on the Ardmore, Okla., website of the Samuel Roberts, Noble Foundation: <http://www.noble.org/Ag/Livestock/Heat/>.

“When there is no daytime wind and/or nighttime temperatures do not drop below 75 degrees so conditions reach a score of 75 (on the Temperature-Humidity Index), producers should be on the alert for heat stress problems,” Hollis said. “When the index reaches 79, the situation has reached the danger point. An index of 84 means

emergency conditions exist.”

Panting scores probably give the best visual method to estimate the severity of heat stress on cattle, he added. If cattle are panting at a rate of 80 to 120 breaths per minute, they are in moderate stress; 120 to 160 breaths per minute mark the danger zone; and more than 160 should be considered an emergency.

“When they see signs of moderate heat stress, producers may have a very short time to provide a mechanism for cooling the cattle before the situation becomes life-threatening,” the veterinarian said.

## Budget for Unified School District 211, Norton

Published in the Norton Telegram Friday, July 30, 2010

1(T)

STATE OF KANSAS  
Budget Form USD-A  
2010-2011

USD# 211

### NOTICE OF HEARING 2010-2011 BUDGET

The governing body of Unified School District 211 will meet on the 12TH day of August, 2010 at 7:30 p.m., at 105 E. Waverly for the purpose of hearing and answering objections of taxpayers relating to the proposed use of all funds and the amount of tax to be levied. Detailed budget information (including budget profile) is available at District Office and will be available at this hearing.

The Amount of 2010 Tax to be Levied and Expenditures (published below) establish the maximum limits of the 2010-2011 Budget. The "Est. Tax Rate" in the far right column, shown for comparative purposes, is subject to slight change depending on final assessed valuation.

## Local cable company improves school channel

Nex-Tech TV subscribers in Norton will see an improvement in the reliability of their local school channel thanks to the recent donation of a new scheduler and upgraded software from Nex-Tech. The content on the school channel is produced by local high school students and features a variety of school-related programming. Customers enjoy viewing Norton High School basketball and football games, as well as school schedules, events, lunch menus, concerts and much more. The Norton School Channel is brought to you exclusively from Nex-Tech on channel 17.

Nex-Tech also provides Norton residents with the option to sub-

scribe to Digital TV. Digital TV is an advanced technology brought via Fiber-To-The-Premise infrastructure that provides superior quality picture and clear, crisp digital sound. Customers enjoy unique features such as a convenient on-screen interactive guide to help them locate their favorite programs, Hi-Def, Digital Video Recorder, Caller ID TV, Video on Demand instant movie rentals and more. In addition, Nex-Tech offers discounts for customers who bundle their services.

For more information about the Norton School Channel or Nex-Tech Digital TV, call 877-4135 or visit the local Nex-Tech office at 117 North Norton.
