Notice of a Finding of No Significant Impact

The USDA, Rural Development has received an application for financial assistance from the City of Oberlin. The proposed improvements, which consists of the construction of a new water treatment facility, sludge lagoon, water well and water distribution improvements, will conform to the United States Environmental Protection Agency (EPA) and the Kansas Department of Health and Environment (KDHE) drinking water

regulations, as well as requirements for ground water disinfections and disposal of treatment residuals. This project includes the following components, approximately 3,800 LF of new water transmission piping to bring the water from the City's existing wells to a single point for treatment and connect to the existing distribution system, a new water treatment facility to address uranium compliance, an approximate 3,200 SF water treatment building to house the treatment equipment and related chemical feed systems, pumps, valves, piping and controls, a new backwash waste lagoon to process clarifier and filter backwash waste from the new water treatment facility. As required by the National Environmental

Policy Act, Rural Development has assessed the potential environmental effects of the proposed project and has determined that the proposal will not have a significant effect on the human environment and for which an Environment Impact Statement will not be prepared. The basis of this determination is made using a regulatory agency and public review of the project. Copies of the Environmental Assessment can be reviewed or obtained at the USDA-RD, 2715 Canterbury Road, Hays, KS 67601. For further information, please contact Dave Barber at 785/628-3081 ext. 400. A general location map of the proposal is shown below.
